Website Editing Guide: Previewing Pages in Sitecore

Previewing Pages

This step is recommended before you publish a page to the live url.

While in sitecore and after saving your page.

Select the publish button in the content ribbon (see screenshot)

![Screenshot of publish button](image.png)

While selected click on the preview link

A new window will open in a new tab using the page you are previewing

You will notice that you are in preview due to url and the editing options as shown below (see screenshot)

![Screenshot of preview window](image.png)

This is a preview version of the web page before you submit it for approval and approve to publish.
You may also email this link to team members for review purposes.

**PLEASE NOTE:** They will need to log in to the content management system to preview the page.
