Lap Inguinal Ujiki

Set-up
Video screens at base of patient. No abx. SCD.

Getting in:
Curvilinear incision at umbilicus to accommodate 12 port
Incision with 11 blade, dissect with S retractors to ant sheath
Rotate retraction to transverse and score anterior fascia at angle
Retract muscle laterally with S, slip in pinky finger and remove retractor
Gentle sweeps with finger to make potential space for insufflation. Try to stay posterior to ensure epigastric vessels are up.
Insert 12 port and insufflate

Placement of 5 ports:
