Chalk

Also known as Blackboard, Chalk is an online learning management system which can be used to share course materials and syllabi, create class discussion forums, share electronic versions of course texts, create online quizzes, and more. NSIT offers regular training sessions on Chalk.

To set up a Chalk site, you'll need to first claim your CNet ID. Chalk sites are not created automatically, but can be set up by visiting chalk.uchicago.edu and clicking on "Request a Site" from the left panel. Make sure to get the CNet IDs of any Course Assistants or Writing Interns so they'll be granted access as well.

For questions about Chalk, contact the site administrators at chalk@uchicago.edu.
