Introduction

How to gain access to UC3

In order to access UC3 resources you have to have a valid CNetID and be a member of the UC3 group.

To be added to the UC3 group you or a sponsor have to provide information like:
name, affiliations, research done on UC3

How to access the UC3 resources

Once a user is authorized to use UC3 resources, it can login to uc3-sub.uchicago.edu using its own CNetID and password.
A local home directory will be created on the host.
The user can submit Condor jobs to the UC3 resources as explained in UC3 Quickstart.
The jobs will run on the different resources as the 'uc3' user.

UC3 Quickstart is a very simple example. See Job Submission for more information on Job submission.
