Welcome to the Griffin Wiki

What is the Griffin Wiki?

Welcome to the Griffin wiki.

A wiki is a website that evolves through additions and changes that users make themselves. With traditional web pages that solicit user feedback, users have to e-mail their suggestions to the site owner, who then posts the changes at their convenience. With a wiki, users can add information directly, and it immediately appears on the site.

Some suggestions to make the Griffin Wiki work for you:

<table>
<thead>
<tr>
<th>Generate Ideas. This wiki is your hub to...</th>
<th>What the wiki is not...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Generate Ideas. Discuss what can be done better. All to get things done!</td>
<td>This is not a personal blog, or avenue to post anything personal.</td>
</tr>
<tr>
<td>Make your to do lists... even when you are not 100% sure what they are. The wiki keeps track of history, so you can revert any changes, worry free!</td>
<td>Not ideal or tracking issues. You can use [Grif-RT].</td>
</tr>
</tbody>
</table>

This wiki provides an interactive way to create a body of knowledge that will serve to guide formal policies and procedures, information that will feed into site help and even projects. If you are new to the wiki, follow these steps to get started.

How do I get around?

Just as there are many different ways that traditional websites structure their navigation, there is no standardized "wiki navigation". In this wiki, we've included four different ways for you to get around:

- **Breadcrumbs** appear at the top of every page. They show the hierarchical path that will get you from your current page back to the top-level page.
- **Navigation Tree** appears on the left side of every page. This is the main navigation for the site, and is broken down into major sections.
- **Child pages** appear on pages where there are other content under the main section.
- **Editing Tools** appear only when you login.
- **Search** allows you to search the entire wiki for the keywords you enter in the search box.
- **Labels** enable you to view the content per "label" topic. Major topics in the wiki are categorized by tags.
- **Index** allows you to see all the pages.

If you can ONLY see section 1 on the Nav Tree, you need to login first using your cnet id and password.
