Embedding Media

You can embed popular forms of media such as YouTube video and Flick stream easily.

To embed YouTube, Flickr, Twitter Stream, Google Doc, etc

1. Copy and paste the media URL.
2. A Widget Connector widget box with the media should show up.

To embed other material using embed code:

1. Cut-and-paste the embed code
2. Select this text, on the editing toolbar click Insert > Other Macros...
3. Search for "HTML".
4. Select "HTML" (The one with the description "Add HTML data onto a Confluence page").
5. Using all default options, click Insert.
