Welcome to the Transplant Immunology and Immunogenetics Laboratory (TIIL) in the Department of Pathology at the University of Chicago Medicine. This laboratory is accredited by the American Society for Histocompatibility and Immunogenetics (ASHI), United Network for Organ Sharing (UNOS), Clinical Laboratory Improvement Amendments (CLIA), College of American Pathologists (CAP), and New York State Department of Health (NYSDH) and it is one of the four ASHI-Approved Fellowship Programs in Histocompatibility and Immunogenetics in the U.S.A.

This specialty laboratory utilizes cutting edge technologies for HLA typing as well as for antibody testing and crossmatching and it is paperless operated. Testing performed in this laboratory contributes to patient care in transplantation, human diseases, pharmacogenomics, and transfusion medicine.

We are committed to the advancement of our field and to excellence in serving our patients and in educating residents, fellows, and undergraduate students.

Susana R. Marino
MD, PhD, D(ABHI)
